

# Crowson

The Crowson Tactile Effects System (TES) operates in a completely unique way, vastly outperforming traditional inertial 'shakers'. Our actuators push against the ground, directly delivering sound and motion energy in a highly controlled and realistic way.

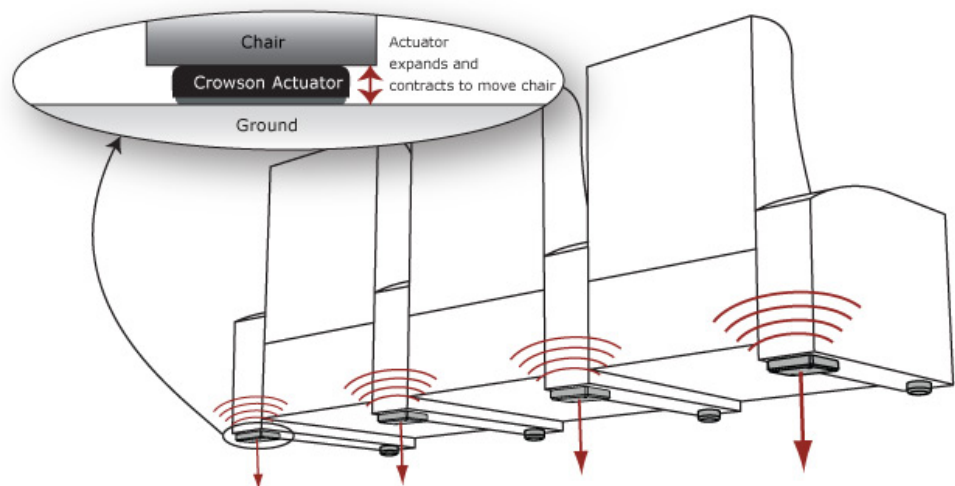

Experience the unmatched speed, accuracy and range of Crowson today.

Our system adds the next dimension in home theatre and music listening by allowing you to feel the bass response through your seating.

## KEY BENEFITS

- Virtually eliminates the noise pollution problems associated with subwoofers.
- Adds a new dimension to home theatre and music with sight sound and now feeling.
- No big unsightly boxes like a subwoofer, just slim line plates underneath your seating.
- Extreme frequency response. Our actuators respond on a linear scale down to 2Hz!

## PRODUCTS AVAILABLE

Shadow-8 Actuators  
BMP-3S Pre-Amplifiers  
D-500 Integrated Amplifiers
