

LINN

KEY FEATURES INCLUDE

- A soft dome high frequency driver with neodymium magnet that provides an exceptionally clean and open sound
- New custom bass/midrange polypropylene drive units with a strong die-cast chassis and dual field shaping magnets that produce a detailed midrange and deep, tight bass response
- Fully shielded drive units enabling the Trikan to be placed close to a television, monitor or computer without causing picture interference
- A high specification crossover that ensures accurate reproduction across the frequency range
- High quality internal cabling to the Trikan's input terminals help to deliver optimum signals to each drive unit

The Linn Trikan Loudspeaker is an attractive and compact, high performance, infinite baffle loudspeaker designed primarily for centre channel applications. Offering pitch accurate sound quality and substantial power handling, the Linn Trikan Loudspeaker complements the appearance of the Linn Katan and Linn Ninka Loudspeakers and is voice matched to them for seamless integration in surround sound applications.

The Trikan can easily be configured as a passive or aktiv loudspeaker. Two removable, reversible link connection boards (patent pending) on the rear of the Trikan, automatically identify and configure the appropriate input links for passive or aktiv playback requirements. The link aktiv connection boards enable the Trikan to be easily and quickly configured either as a single-wired or bi-wired passive loudspeaker, or as a bi-amplified aktiv loudspeaker.

The Trikan offers superior and accurate centre channel reproduction with Linn or other high performance multi-channel application systems. The Trikan may be positioned above or below a television and wall mounted brackets are available to make the Trikan loudspeaker even more versatile in centre channel and multichannel applications.

The Trikan centre channel loudspeaker is available in attractive maple, black ash and American cherry finish, complete with black grille cloth, from qualified Linn outlets worldwide.

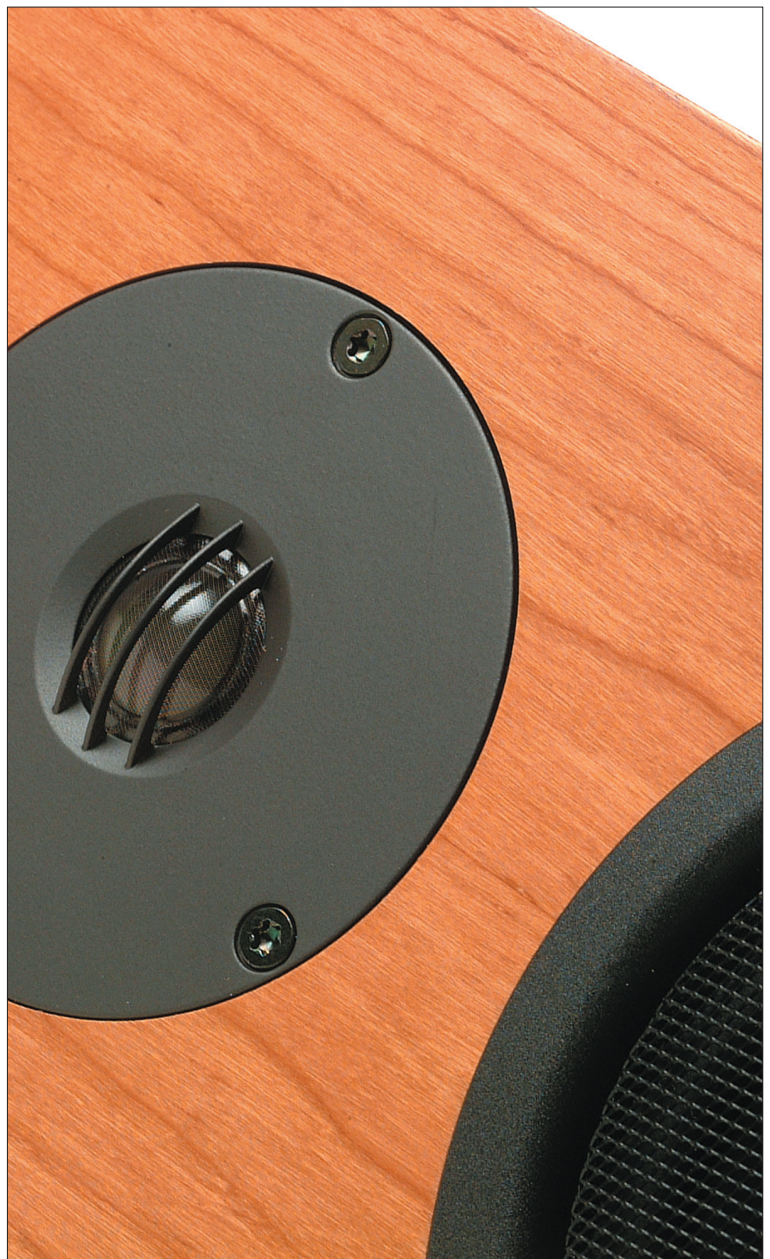

TRIKAN LOUDSPEAKER

SPECIFICATION

A high performance compact centre channel loudspeaker for both passive and aktiv playback

TRIKAN LOUDSPEAKER

TECHNICAL SPECIFICATION

A high performance compact centre channel loudspeaker for both passive and aktiv playback

■	Introduced	2001
■	Type	2 way infinite baffle loudspeaker
■	Volume	9.5 litres
■	Frequency response passive	75Hz-20KHz +/- 3dB
■	Frequency response active	60Hz -20KHz +/- 3dB
■	Input impedance passive	4 ohms
■	Input impedance active	6 ohms treble, 4 ohms bass
■	Efficiency	91dB for 1W at 1m at 1KHz
■	Crossover options	Treble level can be reduced by 1dB on the crossover board
■	Wiring options	Single wiring, bi-wiring, bi-amplification passive and bi-amplification aktiv
■	Minimum amplifier power	30W 8 ohms, 60W 4 ohms
■	Drive units	19mm treble, neodymium magnet, fully screened 2 x 130mm bass/mid, cast chassis, fully screened
■	Dimensions	H 540mm x W 170mm x D 230mm H 21.2 inches x W 6.7 inches x D 9 inches
■	Weight	11kg / 24.25lbs
